## About us...

Knowla Livestock is a family owned and operated company comprising of James and Annie Laurie, Ted and Alison Laurie, and Marie Laurie. Children, Sandy, Doug, Rob, Jack and Georgia play an active role in the properties operation when time permits outside of their own commitments. Marie's husband Cliff passed away in 1992 and was the boy's inspiration through his work ethic and passion for livestock.

We are the fourth generation to run beef cattle on the headwaters of the Barrington River at Moppy west of Gloucester. Surrounded by the Barrington Tops National Park 2000 hectares and a further 600 hectares of leased land is managed. Whilst it is undulating to steep grazing country it is ideal for cow calf production. The 130 hectare Kia Ora property, Kanangara on the outskirts of Gloucester was purchased in 2007 and is the site for our annual production sale.

Traditionally Devon/Shorthorn crossbreeders, progeny from the Kholwha Devon stud were sold at the Gloucester bull sale from 1981. 2019 saw us celebrate 25 years of breeding registered Angus cattle, with the foundation bloodlines purchased from Dulverton, Forres and DSK Angus studs. Today, just over 250 registered and performance recorded Angus females are joined, with elite cows placed into an embryo transfer program as well.

Just over 400 commercial cows are joined to produce feeder steers for either the EU grain fed market, or the heavy grass-fed MSA domestic and export markets. An annual pasture improvement program over approximately 250 hectares produces winter feed and establishes high performance pastures to increase overall production. As a result, the total kilograms produced has almost doubled in the past twenty years.

## The Genetics

We feel this year's team offers all those attributes that has allowed the Angus breed to become such a dominant player in the southern Australian beef marketplace. Whilst many display exceptional growth, we also select heavily for calving ease and the carcass traits which make Angus cattle so acceptable throughout the industry. We continue to introduce new genetics into our herd and this year's team is no different.

GAR Ashland, Baldridge Alternative E125, and GB Fireball are all high use USA A.I. sires we have introduced to our lineup. Australian bred bulls, Landfall Nobleman N106, Karoo K12 Realist N278 and Inglebrae Reality N6 also make their debut. The next generation of existing sire lines are represented with sons of Knowla Monty M186 (Highpoint), Knowla Novatel N131 (General K7), and Knowla Nobleman N127 (King).

The Ashland sons display exceptional growth and presence typified by Rainmaker R131 at Lot 3 and Rainmaker R153 at Lot 8. As high growth bulls they are also easy doing with positive carcass attributes. The Alternative and Fireball sons are in the yearling section of the catalogue. The Alternative sons leading off at Lots 25 and 26 are standouts in the younger age group. Both bulls have tremendous carcass thickness and presence with nicely balanced data behind them, moderate birth, with high growth, and carcass data to suit most programs. For those looking for outcross genetics, three of the Fireball sons are fully imported embryos, with Softfire S23 at Lot 33 an attractive well-balanced individual.

In the debut Australian bulls, Landfall Nobleman N106 has a standout son at Lot 7. Rushmore R129 typifies the extra growth and performance that his sire delivers. Realist N278 has well grown sons in both the older and younger bull drafts, with possibly the standout at Lot 27 in Sureal S08. The Realist sire line produces an even type with overall body length and sound structure readily apparent. The other Reality blood sire making his debut is Inglebrae Reality N6. His sons don't quite have the stature of the Realist N278 sons but deliver calving ease and very good carcass attributes. Roma R135 at Lot 1 typifies this sire line.

For the fourth year, Bowmont King K306 and Dunoon Kind K1354 are represented. The solid carcass shape and easy doing attributes from both sire lines is apparent, with both bulls getting sons in the front pen at Lot 2 and Lot 6, even whilst giving a lot away in age. The King son, Knowla Nobleman N127 is well represented with a standout at Lot 29, with all the carcass attributes of his sire.

The Highpoint line is back again with some big strong bulls in the front pens. The Highpoint son, Monty M186, produces a similar powerful type with Rocky R105 at Lot 5 displaying this performance. The homebred Novatel N131 returns after his debut last year, albeit with a reduced number of sons as he spent most of the time in the commercial herd. Don't miss Supernova S91 at Lot 28 who commands attention with his presence and growth. Another homebred, Payload P175 makes his debut with some attractive sons in the yearling group. Have a look at Specialist S27 at Lot 44.

For those people looking for bulls to use over heifers we have introduced our 'Heifer Tick' system to the catalogue this year. Whilst each bull in the catalogue has had a birth weight collected and recorded, and the TACE analysis does a good job of identifying those bulls best suited for heifer joining's we like to add our extra knowledge to the assessment. For example, we know which pedigrees often produce larger calves, and we visually assess the shoulder shape on each bull. The outcome is a three-tiered system as follows:

- ✓✓✓ Sleep easy at night heifer bull.
- ✓✓ Under most circumstances a very safe heifer bull.
- ✓ Use on well grown heifers with good management up until calving.

At the completion of the bull lots are six PTIC stud heifers, to be sold in single lots. They have been selected straight out of our joined keeper stud heifers and will be on the point of calving at the sale. They were selected as we have retained full sisters or several sisters closely related. As in previous years we will offer 100 unjoined commercial heifers in pens of 15 to 18 head, that represent the bloodlines used in both our stud and commercial herds and will sell as EU accredited.

# Sale Details

## HOW TO GET THERE

From Gloucester travel 3.5 kms towards Barrington and turn right into Bowman Farm Road, (from the north turn left 2 kms on southern side of Barrington) for 1km over Barrington River then turn right onto Kia Ora Road for 2km and on top of hill continue straight on into Old Kia Ora Road for 2 km to Sale complex.

## FARM BIOSECURITY

All persons attending the property will be required to register and record contact details.

## INSPECTION

Sale bulls and sale commercial females may be inspected by arrangement with either vendors or the agents. All lots will be penned on sale day by 10 am at the sale complex, Kanangara. **NO CHILDREN ALLOWED IN SALE PENS.**

## ADDITIONAL INFORMATION

A supplementary sheet will be produced for sale day.

## REBATE

The vendors will provide a 4% rebate to outside agents introducing buyers in writing 24 hours prior to the sale and settling on their behalf within seven days.

## PHONE BIDDING

Mobile phone bidding on the day can be arranged prior to the sale through the Agents, Elders Walcha, on 6774 2600 or Allan Laurie 0455 821 394. The sale will also be on Auctions Plus. To register contact (02) 9262 4222 or visit [www.auctionsplus.com.au](http://www.auctionsplus.com.au)

# Sale Details

## CATERING

Morning tea, light refreshments and lunch will be provided with all proceeds going to the Gloucester Pony Club.

## INSURANCE

It will be the responsibility of the purchasers to insure their bulls if required which can be arranged through Achmea representative at the sale.

## BUYERS INSTRUCTIONS

Please complete the buyer's instruction slip at the rear of the catalogue. No verbal instructions will be accepted.

## DELIVERY

The vendors will provide delivery on all bulls to all major centres in NSW at their expense, as soon as possible following the sale.

## TAKING DELIVERY

Upon taking delivery of your purchase it is very important to realise that our bulls have been run in large mobs since weaning. If you are a single bull purchaser the day he arrives at your property can be quite traumatic as it will be the first time he is away from his contemporary group, and into a strange environment. Have some other cattle in the yard to ease him into his new surroundings, a few steers or a pregnant cow will do. Our bulls are handled with horse and dogs all their life and whilst we educate them to be comfortable with people on foot or motorbike, they have only been moved on horseback. Again it is important that the first time you move your new bull that it is in the company of other cattle that are comfortable with your methods.

## HERD HEALTH

All the bulls have been fully vaccinated for 7 in 1, Vibrio, and 3 Day Sickness, but require boosters in autumn 2023 and a broad spectrum drench would be advisable at the same time. They have been tested free of Pestivirus. Both properties involved in the sale, Knowla and Kanangara were in Bovine Johones disease protected areas, and have had no history of the disease. Biosecurity plan implemented, JBAS 7. A National Cattle Health Declaration will be supplied to all purchasers.

Stuart Knox of Taree Veterinary Hospital will subject the bulls to a breeding soundness examination on 30th June, 2022. This will include internal and external examination of the reproductive tract, palpation and scrotal measurement, as well as a semen quality test.

## PRIVACY INFORMATION

The majority of the animals included in this catalogue are registered with the Angus Society of Australia. The buyer is encouraged to have transferred to his or her membership any animals purchased. In order for the transaction to be effected, the buyer will need to provide certain personal information to the Society and consent to the collection and disclosure of that information by the Society in certain circumstances. If the buyer does not wish for his or her personal information to be collected and disclosed by the Society, the buyer must opt out of the option to consent by completing the form which will be available on sale day and forwarding it to the Society. If the form is not completed, the buyer will be taken to have consented to the collection and disclosure of that information by the Society.

## DISCLAIMER

The owners, employees and representatives of Knowla Livestock accept no liability for any accidents that may occur. Although such occurrences are rare, any persons attending the Knowla Livestock sale do so at their own risk.

All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor or the selling agents make no other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

## ATTENTION BUYER

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

## PARENT VERIFICATION SUFFIXES

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

# : DNA verification has not been conducted.

E : DNA verification has identified that the sire

and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.
